+ Experience

Hewlett Packard
Enterprise
Nov 2015-Present

User Experience Designer

Played an integral part in the design development and implementation of a cloud based, mobile enabled sales tool within HPE. Produced initial wireframes, conducted user tests, developed initial prototypes and delivered final code (HTML, CSS, JS) and graphic content.

Managed the production of multiple video features that are used to demonstrate the capabilities of internal HPE Sales tools. Created and edited audio, video and graphic content.

Hewlett Packard
May 2008-Nov 2015

User Experience Designer

Designed, developed, and maintained a responsive, mobile friendly internal Marketing Dashboard. Built initial prototypes, produced HTML and CSS, and implemented final code within a corporate approved content management system (CMS).

EDS
Jun 2000-May 2008

User Experience Designer

Contributed to the delivery and maintenance of EDS Web Standards. An internal web site used by many within the development community for Web standards and usability guidance. Built responsive, W3C compliant, HTML Web and Email templates, conducted user tests and participated in usability research.
